PROFILE

A full-stack developer with a passion for creating efficient, user-friendly applications that enhance digital experiences. I thrive in collaborative environments, actively contributing to brainstorming, problem-solving, and refining solutions. With hands-on experience in development, debugging, and optimizing software, I'm always eager to learn, adapt, and deliver high-quality results.

WORK EXPERIENCE

Fullstack Developer

Tracksend   2022-present

- Developed and implemented the Delivery Optimizer, an end-to-end feature integrating a custom AI model, enhancing message efficiency.
- Led the development of Tracksend's current website, establishing a strong online presence.
- Collaborated on integrating the WhatsApp messaging channel, expanding communication options for users.
- Enhanced RCS messaging capabilities, improving user engagement and delivery success rates.
- Introduced preview functionality for SMS, RCS, and WhatsApp campaigns, allowing users to refine messages before sending.
- Integrated the conversations feature from a separate app into the SMS automation platform using micro frontend architecture with module federation, enabling seamless cross-app functionality.
- Implemented Google Sign-Up/Sign-In, improving user accessibility and onboarding experience.

Freelance Web Developer

self employed   2021-present

- Designed and launched multiple websites, including church platforms, a book launch site, and an e-commerce store for shoe sales.
- Managed and maintained a real estate website, ensuring optimal performance and content updates.

Website Support

Prowedge   2021-2021

- Email support
- Backup emails with Cpanel
- Backup and monitor uptime Orion
- Monitor Google Analytics
- Fix Bugs and Issues
